

**scale\_option** — Option for resizing text, markers, and line widths

Description      Quick start      Syntax      Option      Remarks and examples  
Also see

## Description

Option **scale()** makes all the text, markers, and line widths on a graph larger or smaller.

## Quick start

Increase the size of all text, markers, and line widths by 20%

*graph\_command* ..., ... **scale(1.2)**

Reduce the size of all text, markers, and line widths by 20%

*graph\_command* ..., ... **scale(.8)**

## Syntax

<i>scale_option</i>	Description
<b>scale(#)</b>	specify scale; default is <b>scale(1)</b>

**scale()** is *unique*; see [G-4] **Concept: repeated options**.

## Option

**scale(#)** specifies a multiplier that affects the size of all text, markers, and line widths on a graph.  
**scale(1)** is the default.

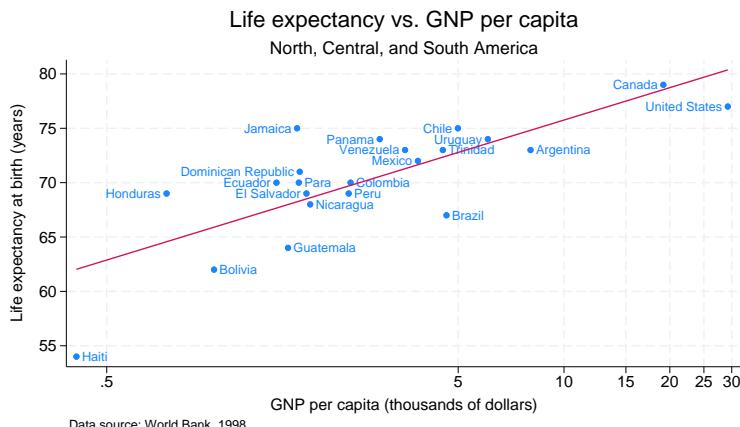

To increase the size of all text, markers, and line widths on a graph by 20%, specify **scale(1.2)**.

To reduce the size of all text, markers, and line widths on a graph by 20%, specify **scale(.8)**.

## Remarks and examples

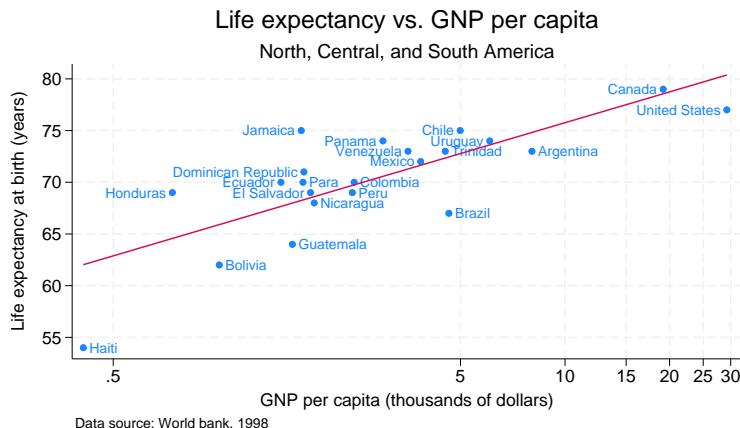

Under **Advanced use** in [G-3] **marker\_label\_options**, we showed the following graph:

```
. twoway (scatter lexp gnppc, mlabel(country) mlabv(pos))
          (line hat gnppc, sort)
          , xsca(log) xlabel(.5 5 10 15 20 25 30) legend(off)
          title("Life expectancy vs. GNP per capita")
          subtitle("North, Central, and South America")
          note("Data source: World Bank, 1998")
          ytitle("Life expectancy at birth (years)")
```

Here is the same graph with the size of all text, markers, and line widths increased by 10%:

```
. twoway (scatter lexp gnppc, mlabel(country) mlabv(pos))
    (line hat gnppc, sort)
    , xsca(log) xlabel(.5 5 10 15 20 25 30) legend(off)
    title("Life expectancy vs. GNP per capita")
    subtitle("North, Central, and South America")
    note("Data source: World Bank, 1998")
    ytitle("Life expectancy at birth (years)")
    scale(1.1)                                         (new)
```

All we did was add the option `scale(1.1)` to the original command.
