[Syntax](#)

[Option](#)

[Remarks and examples](#)

Description

Option `scheme()` specifies the graphics scheme to be used. The scheme specifies the overall look of the graph.

Quick start

Render the graph using monochromatic scheme `s1mono`

```
graph_command ... , ... scheme(s1mono)
```

Render the graph in the manner of the *Economist* magazine

```
graph_command ... , ... scheme(economist)
```

Render the graph using the preferred look for the *Stata Journal*

```
graph_command ... , ... scheme(sj)
```

Render the graph using a color scheme with higher contrast than the default color scheme

```
graph_command ... , ... scheme(s1color)
```

Render the graph with a color scheme using a black background

```
graph_command ... , ... scheme(s1rcolor)
```

Syntax

scheme_option

Description

`scheme(schemename)`

specify scheme to be used

`scheme()` is *unique*; see [G-4] **Concept: repeated options**.

Option

`scheme(schemename)` specifies the scheme to be used. If `scheme()` is not specified the default scheme is used; see [G-4] **Schemes intro**.

Remarks and examples
