

**set\_defaults** — Reset system parameters to original Stata defaults

[Description](#)   [Syntax](#)   [Option](#)   [Remarks and examples](#)   [Also see](#)

## Description

`set_defaults` resets settings made by `set` to the original default settings that were shipped with Stata.

`set_defaults` may not be used with `java`, `lapack`, `putdocx`, `python`, `rng`, or `sort` system-parameter categories.

## Syntax

```
set_defaults { category | _all } [ , permanently ]
```

where *category* is one of [memory](#) | [output](#) | [interface](#) | [graphics](#) |

[network](#) | [update](#) | [trace](#) | [mata](#) | [unicode](#) | [other](#)

## Option

`permanently` specifies that, in addition to making the change right now, the settings be remembered and become the default settings when you invoke Stata.

## Remarks and examples

stata.com

### ▷ Example 1

To assist us in debugging a new command, we modified some of the `trace` settings. To return them to their original values, we type

```
. set_defaults trace
-> set trace off
-> set tracedepth 32000
-> set traceexpand on
-> set tracesep on
-> set traceindent on
-> set tracenumber off
-> set tracehilite ""
(preferences reset)
```
